

These terms and conditions (Terms) together with our Privacy Policy set out the basis on which you may browse and use our website and any services offered through it (collectively, the Site). In addition to these Terms, you acknowledge and agree that you will comply with any Guidelines, Workflows, Ethics, or other policies applicable to the journal. The Site is owned and operated by a company registered in Romania (we, us, our or the Company).

Your use of the Site will be governed by these Terms which serve as a legal contract between us and you. By browsing or using the Site and/or any services, content, or materials made available through the Site, you are agreeing to be legally bound by the Terms and our Privacy Policy

We do not guarantee that the Site, or any content on it, including the JOURNAL, will always be available, uninterrupted, up to date, or otherwise free from errors, omissions, bugs, or viruses.

Access to the Site is permitted on a temporary and as-is basis. We may suspend, withdraw, discontinue, or change all or any part of the Site without notice. We will not be liable to you if for any reason our site is unavailable at any time or for any period. You are responsible for regularly creating backup copies of your Contribution.

The Editors of the “JOURNAL” maintain a certain level of requirements for selection and accepting the articles/manuscripts submitted by authors. These rules are determined by the scientific fields covered in the journal.

An essential feature of professional scientific community is the acceptance of the moral code which sets the basic rules of behavior and the responsibilities of the scientific community members before each other and in relation to the public. Such a code is defined by the intention to ensure maximum benefit to the professional community and to limit the actions, which could serve the interests of individuals, as well as to ensure an author’s intellectual property rights. In addition to the aforesaid Editors set a list of ethical standards below. It should guide persons (editors, authors and reviewers) involved in the publication of research results in the field of engineering and related industries and other fields of science considered in the journal. The Editors believe that the rules presented below are approved by the majority of qualified researchers; they may also be of great help to students, graduate students and young scientists who are beginners in research activity. Scholars of authority may welcome the opportunity to once again return to the issues that are important to scientific practice.

Ethical Obligations of Editors of JOURNAL

1. All submitted materials are carefully selected and reviewed. An editorial board reserves the right to reject an article/ manuscript or return it as requiring improvement. The author is obliged to improve the article according to the remarks of the reviewers and the editorial board.
2. An editor should considerate all manuscripts offered for publication without prejudice, evaluating each on its merits without regard to race, religion, nationality, status, or institutional affiliation of the author(s). An editor may take into account relationships of a manuscript under consideration to others previously offered by the same author(s).
3. An editor should consider manuscript submitted for publication without delays.
4. The whole responsibility for acceptance or rejection of an article rests with the editor. Responsible and reasonable approach to the duty requires that the editor seek advice from reviewers. However, manuscripts may be rejected without external review if considered by the Editors to be inappropriate for the journal.
5. The editor and members of the editor’s staff should not disclose any information about a manuscript under consideration to anyone other than those from whom professional advice is sought. After a positive decision has been made about a manuscript, it should be published in the journal and in the website of the journal.
6. It is acceptable to spread articles published in the journal or quotations over the Internet with precondition of giving references and links to the primary source. Publication and/or distribution of materials from the journal by third parties or organizations in print and electronic media are prohibited.
7. According to the international law of electronic media copyright, copying of materials published in electronic journal in full or in part is not allowed without the prior written permission of author(s) and Editors. In case of use of the published materials in context of other documents, references to the primary source are required.
8. An editor should respect the intellectual independence of authors.
9. Editorial responsibility and authority for any manuscript authored by an editor and submitted to the editor’s journal should be delegated to other qualified person, such as a member of its Editorial Board.
10. Unpublished information, arguments, or interpretations disclosed in a submitted manuscript should not be used in an editor’s own research except with the consent of the author. However, if such information indicates that some of the editor’s own research is unlikely to be profitable, the editor could ethically discontinue the work. When a manuscript is so closely related to the current or past research of an editor as to create a conflict of interest, the editor should arrange for some other qualified person to take editorial responsibility for that manuscript.
11. If an editor is presented with convincing evidence that the main substance or conclusions of a report published in an editor’s journal are erroneous, the editor should facilitate publication of an appropriate report pointing out the error and, if possible, correcting it. The report may be written by the person who discovered the error or by an original author.
12. An author may request that the editor not use certain reviewers in consideration of a manuscript. However, the editor may decide to use one or more of these reviewers, if the editor feels their opinions are important in the fair consideration of a manuscript. This might be the case, for example, when a manuscript seriously disagrees with the previous work of a potential reviewer.

Ethical Obligations of Authors

1. Main duty of an author is to present an accurate account of the research performed as well as an objective discussion of its significance.
2. Whole responsibility for content of articles and for the fact of publication rests with author(s). Editors do not bear responsibility for probable damage caused by publication of a manuscript to authors or third parties. Editors have the right to withdraw the article already published in case somebody's rights or generally accepted norms appear violated. Editors inform author(s) of the article, persons who gave recommendations and representatives of organization, where the research was held, about the fact of withdrawal.
3. An author should be aware that journal space is a limited resource and should use it wisely and economically.
4. A primary research report should contain sufficient detail and reference to public sources of information to permit the author's peers to repeat the work. When requested, the authors should make a reasonable effort to provide samples of unusual materials unavailable elsewhere, with appropriate material transfer agreements to restrict the field of use of the materials so as to protect the legitimate interests of the authors.
5. An author should cite those publications that have been influential in determining the nature of the reported work and that will guide the reader quickly to the earlier work that is essential for understanding the present investigation. Except in a review, citation of work that will not be referred to in the reported research should be minimized. An author is obligated to perform a literature search to find, and then cite, the original publications that describe closely related work. For critical materials used in the work, proper citation to sources should also be made when these were supplied by a non author.
6. Any unusual hazards appearing during an investigation should be clearly identified in a manuscript reporting the work.
7. Fragmentation of research reports should be avoided. A scientist who has done extensive work on a system or group of related systems should organize publication so that each report gives a well-rounded account of a particular aspect of the general study.
8. In submitting a manuscript for publication, an author should inform the editor of related manuscripts that the author has under editorial consideration or in press. Copies of those manuscripts should be supplied to the editor, and the relationships of such manuscripts to the one submitted should be indicated.
9. It is improper for an author to submit manuscripts describing essentially the same research to more than one journal of primary publication, unless it is a resubmission of a manuscript rejected for or withdrawn from publication. It is generally permissible to submit a manuscript for a full paper expanding on a previously published brief preliminary account (a "communication" or "letter") of the same work. However, at the time of submission, the editor should be made aware of the earlier communication, and the preliminary communication should be cited in the manuscript.
10. An author should identify the source of all information quoted or offered, except that which is common knowledge. Information obtained privately, as in conversation, correspondence, or discussion with third parties, should not be used or reported in the author's work without explicit permission from the investigator with whom the information originated. Information obtained in the course of confidential services, such as refereeing manuscripts or grant applications, should be treated similarly.
11. An experimental or theoretical study may sometimes justify criticism, even severe criticism, of the work of another scientist. When appropriate, such criticism may be offered in published papers. However, in no case is personal criticism considered to be appropriate.
12. The co-authors of a paper should be all those persons who have made significant scientific contributions to the work reported and who share responsibility and accountability for the results. Other contributions should be indicated in a footnote or an "Acknowledgments" section. An administrative relationship to the investigation does not of itself qualify a person for co-authorship (but occasionally it may be appropriate to acknowledge major administrative assistance). Deceased persons who meet the criterion for inclusion as co-authors should be so included, with a footnote reporting date of death. No fictitious name should be listed as an author or coauthor. The author who submits a manuscript for publication accepts the responsibility of having included as co-authors all persons appropriate and none inappropriate. The submitting author should have sent each living co-author a draft copy of the manuscript and have obtained the co-author's assent to co-authorship of it.
13. The authors should reveal to the editor and to the readers of the journal any potential and/or relevant competing financial or other interest that might be affected by publication of the results contained in the authors' manuscript. All authors should not have any personal significant financial interest and employment or other relationship with entities that have a financial or other interest which can affect the results described by the manuscript.

Ethical Obligations of Reviewers of Manuscripts

1. As the reviewing of manuscripts is an essential step in the publication process, and therefore in the operation of the scientific method, every scientist has an obligation to do a fair share of reviewing.
2. A chosen reviewer who feels inadequately qualified to judge the research reported in a manuscript should return it promptly to the editor.
3. A reviewer of a manuscript should judge objectively the quality of the manuscript, of its experimental and theoretical work, of its interpretations and its exposition, with due regard to the maintenance of high scientific and literary standards. A reviewer should respect the intellectual independence of the authors.
4. A reviewer should be sensitive to the appearance of a conflict of interest when the manuscript under review is closely related to the reviewer's work in progress or published. If in doubt, the reviewer should return the manuscript promptly without review, advising the editor of the conflict of interest.
5. A reviewer should not evaluate a manuscript authored or co-authored by a person with whom the reviewer has a personal or professional connection if the relationship would bias judgment of the manuscript.

6. A reviewer should treat a manuscript sent for review as a confidential document. It should neither be shown to nor discussed with others except, in special cases, to persons from whom specific advice may be sought; in that event, the identities of those consulted should be disclosed to the editor.
7. Reviewers should explain and support their judgments adequately so that editors and authors may understand the basis of their comments. Any statement that an observation, derivation, or argument had been previously reported should be accompanied by the relevant citation. Unsupported assertions by reviewers (or by authors in rebuttal) are of little value and should be avoided.
8. A reviewer should be alert to failure of authors to cite relevant work by other scientists, bearing in mind that complaints that the reviewer's own research was insufficiently cited may seem self-serving. A reviewer should call to the editor's attention any substantial similarity between the manuscript under consideration and any published paper or any manuscript submitted concurrently to another journal.
9. A reviewer should act promptly, submitting a report in a timely manner.
10. Reviewers should not use or disclose unpublished information, arguments, or interpretations contained in a manuscript under consideration, except with the consent of the author. If this information indicates that some of the reviewer's work is unlikely to be profitable, the reviewer, however, could ethically discontinue the work

In these terms "Intellectual Property Rights" means any patents, registered and unregistered trade-marks and service marks, domain names, registered designs and design rights, copyright (including such rights in computer software and databases), database rights and moral rights (in each case for the full period thereof and extensions, revivals, and renewals thereof), applications for the foregoing and the right to apply for any of the foregoing anywhere in the world, and all similar rights anywhere in the world including those subsisting in inventions, designs, drawings, and computer programs.

We may revise the Terms at any time by amending this page. Your use of the Site will be subject to the most recent version of the Terms available on the Site. We recommend that you read through the Terms available on the Site regularly so that you can be sure that you are aware of any changes that may apply to you.

Unless the Company has expressly accepted additional or different terms in writing, the Company rejects any terms or conditions of a Customer that are in addition to or in conflict with these Terms. Any such additional or conflicting terms shall be considered as null and void. These Terms apply to all services, Company's proposals and confirmations, even if it is not explicitly referenced, unless Company and the Customer agree otherwise in writing.

You are responsible for your access to the Site, including: -ensuring that all persons who access the Site through your internet connection are aware of these Terms and other applicable terms and conditions, and that they comply with them; -and that your internet enabled device and telecommunications systems carry the appropriate anti-virus software necessary to minimise the risk of any harmful viruses infecting your internet enabled device.

On the Site the Company offers publication services, journals. The specific items and prices or subscription terms can be gathered from the details provided in each case on the Site.

At all times when using or accessing the Site you represent, warrant and undertake that you will: -not breach any applicable laws, statutes, rules, regulations, guidelines, directives, and codes; -not use the Site to seek or offer any goods or services; - respond promptly to communications from; -not publish, post, upload, store, distribute, or disseminate anything which solicits or harvests another user's password or other account information; -not reverse engineer, decompile, disassemble, or otherwise attempt to obtain the Site's source code; -not misuse the Site by knowingly introducing viruses, Trojans, worms, logic bombs, third-party or external links, or other malicious or harmful material; -not attempt to gain unauthorised access to the Site, the server on which the Site is stored or any server, computer, or database connected to the Site; -not attack the Site via a denial of service attack or a distributed denial-of-service attack; -and comply with the Policies and all reasonable instructions given by us from time to time.

A failure to comply with our conduct expectations set out above, or any other part of these Terms, all of which we reserve the right to determine in our sole discretion, may result in the: -suspension or termination of your Account; -deletion of your Contribution; -and/or suspension or termination of your right to use the Site. The actions above shall be without prejudice to any other rights or remedies which may be available to us.

You must ensure that the information you provide during your registration is complete, accurate, and kept up to date. Your Account is personal to you. We reserve the right to validate the account information supplied at any time. Once registered, it is your responsibility to keep your password and any other security information confidential. We will be entitled to assume that any person that logs into or uses your Account is you. You must notify us immediately if you know or suspect that anyone other than you have had access to or knows your password. You must be 18 (eighteen) or older in order to use the Site. The personal data requested from you during the registration procedure must be true and correct. By submitting such data you undertakes all the responsibilities regarding the submission of such personal data to the Company. By approving the completed registration form, you submit the proposal to conclude an agreement regarding the access and use of the Site. Subsequently, you shall receive an email from the Company containing your personal access data. This confirmation e-mail constitutes that the Company has accepted the your registration proposal. The Company is entitled to turn down individual registrations for Site without stating any reasons. The access data (email address and password, or user name and password) are exclusively for your personal use. You may not pass on or otherwise disclose personal access data to third parties. You shall be liable for all consequences of third-party actions if access data is being misuses (including payment for orders if such orders are placed without authorization).

In the event of any breach of any term of Terms and/or in particular: -If incorrect data are provided during registration, and/or -If access data (esp. the password) is disclosed without Company's authority to do so, the Company shall be entitled to temporarily or permanently block your access data, and/or to finally and conclusively refuse your access to the Site without prior notice.

With the exception of articles published on our Site marked "Open Access", which may be used in accordance with the terms of the licenses described in the Publication of Contributions section below, for all other pages of the site: - all Intellectual Property Rights in the Site are owned, and will remain owned, by us or our licensors at all times. You may not copy or use any part of the Site other than as expressly permitted by the Terms; and; - you may print off one copy, and may download extracts, of any page(s) from the Site for your personal use and link to the Site as permitted under the Linking to Journal. If you are an Account holder you may deal with any Contribution in accordance with these Terms, our Policies, and our instructions to you.

You acknowledge and agree that articles/ manuscripts (including all drafts, notes, and preparatory material and/or other Contributions related to the article) prior to first publication are highly confidential (Confidential Information). You warrant and agree that you will (a) hold all Confidential Information at all times under conditions of secrecy and will take all reasonable steps to preserve its confidentiality; (b) use Confidential Information solely for the purpose of performing any services authorised by us and for no other purpose whatsoever; and (c) not disclose Confidential Information to any third party or use it for the benefit of any third party other than as permitted by us (which may only be given on obtaining undertakings similar to those in this paragraph from such parties).

Prior to publication of your Contribution on the licence terms set out in the Publication of Contributions section below, you grant, and you represent and warrant, that you have the right to grant to us a non-exclusive, irrevocable, perpetual, transferable, sub-licensable, worldwide, royalty-free licence to publicly perform, copy, reproduce, display, make available, communicate to the public, modify, edit, manage, distribute, store, and publish any and all of your Contribution in print and electronic form, including on the JOURNAL in order to prepare an article for publication in our journal(s).

Publication of Contributions (Articles/ Manuscripts). You acknowledge and agree that, if and once editorially accepted for publication, your Contribution shall be published by us under the Creative Commons Attribution 4.0 License (<http://creativecommons.org/licenses/by/4.0/>) and any data relating to the article (including without limitation any reference lists) is distributed pursuant to the Creative Commons Public Domain Dedication waiver (<http://creativecommons.org/publicdomain/zero/1.0/>).

For the avoidance of doubt, you shall retain the non-exclusive right to publish or otherwise use your Contribution and shall be the "Licensor" of the "Licensed Material" for the purposes of the Creative Commons Attribution 4.0 Licence and Creative Commons Public Domain Dedication waiver.

If we consider that the copyright in your Contribution has been or is likely to be infringed, we shall be entitled (on giving notice where possible to you) to take such steps to deal with the matter as we may consider appropriate. You undertake not to do anything which may compromise or prejudice our conduct of such claim and we shall be entitled on giving notice to you to use your name and the name of any other co-author as a party to such proceedings and to control, settle, or compromise such proceedings as we see fit. You shall (and shall procure that any other co-authors shall) co-operate with and give all reasonable assistance to us in the conduct of such claim.

We reserve the right to refuse to publish any article or other Contribution for any reason.

By submitting or making a Contribution (including without limitation all tables, abstracts, illustrations, data, diagrams, and other materials accompanying the text of the Contribution) for the purposes of publication by us you represent and warrant that: -you are the sole author of the Contribution, or, if not, you have been authorised by and have the full permission, licence, and consent of all co-authors to submit the Contribution; -you are legally able and entitled to submit the Contribution and authorise us to publish the Contribution in accordance with the terms this section; -the Contribution is original, has not already been published in any other form or is not currently under consideration for publication by another journal; -you have obtained all necessary permissions and licences for any third-party material, data, or code contained in the Contribution (including without limitation all illustrations, charts, photographs, maps, or other material) and the Contribution does not infringe any copyright, trade mark right, or any other rights of any third party; -you have disclosed to us in accordance with any Policies all potential conflicts of interest, including without limitation, personal or political interests, commercial associations, or financial interests held by you and any co-authors; -the Contribution contains nothing that is unlawful, defamatory, legally privileged, or which would, if published, constitute a breach of contract, or of confidentiality, or breach of privacy; -no advice, recipe, formula, or instruction in the Contribution will if followed or implemented by any person cause loss, damage, or injury to them or any other person; -any research conducted for the Contribution has been conducted in accordance with applicable laws, regulations and codes of practice; -you have adhered to the Policies in your preparation and submission of the Contribution; -and due care, diligence, and all other requisite investigations were carried out in the preparation of the Contribution to ensure its accuracy and all statements contained in it purporting to be factual are true and correct.

Article Processing Charges. In future, Publication of an article with us requires payment of a non-refundable article processing charge (APC). In future, In the event an article is accepted for publication, the author originally submitting the article intended for publication (whether for himself/herself or on behalf of a group of authors or an institution) will be invoiced for the applicable APC. Payments of APCs must be made in the period stipulated on our invoice. You acknowledge and agree that payment of an APC does not guarantee publication of an article.

Applicable Law, Place of Jurisdiction. These Terms and Purchase Documents, their conclusion, performance, validity, termination and any relations of the Parties in regard to the Terms and Purchase Documents shall be governed by the laws of the Romania, European Union. All disputes and disagreements which may arise in relation to the Terms and/or Purchase Documents shall be resolved by the Parties through mutual negotiations. Should the negotiations fail, the dispute shall be finally resolved by the competent court of the Romania (the venue of litigation shall be Brasov).

Our Liability. The Company's liability under the Terms and Purchase Documents shall be limited to the value of the Products/Services (which is/are purchased) and only due to the Company's fault actions which needs to be proved by the Customer. The Company shall never be liable for trading loss, consequential loss or any other indirect loss. The Company shall in no case be liable for the Customer's losses resulting through no fault on the Company's side. Except in case of willful misconduct or gross

negligence, the Company shall never be liable for direct or indirect loss including loss of use, revenue, savings, profit, interest, goodwill or opportunity, costs of capital, costs of replacement or substitute use or performance, loss of data, any claims arising from Customer's third party contracts, or for any type of indirect, special, liquidated, punitive, exemplary, collateral, incidental or consequential damages, or for any other loss or cost of a similar type and trading loss which results from the infringement of any intellectual or industrial property right, license or any other right of third parties.

If the Company is held liable by a third party for a loss for which the Company is not liable under these Terms and Purchase Documents or otherwise, then the Customer shall indemnify the Company against any such loss, damage, interest and/or other cost whatsoever incurred by the Company with regard thereto.
